Eight stories in 11,946 headlines

Coverage and tone of eight geopolitical themes, 8 Jun 2026 to 9 Nov 2026
Source: daily news aggregator archive (MongoDB), scored with a local language model · Prepared 9 November 2026

The Iran–US conflict dominated the archive with **738** headlines, while Yemen was the darkest theme: an average tone of **−0.70**, with **96%** of its headlines negative.

KEY FINDINGS

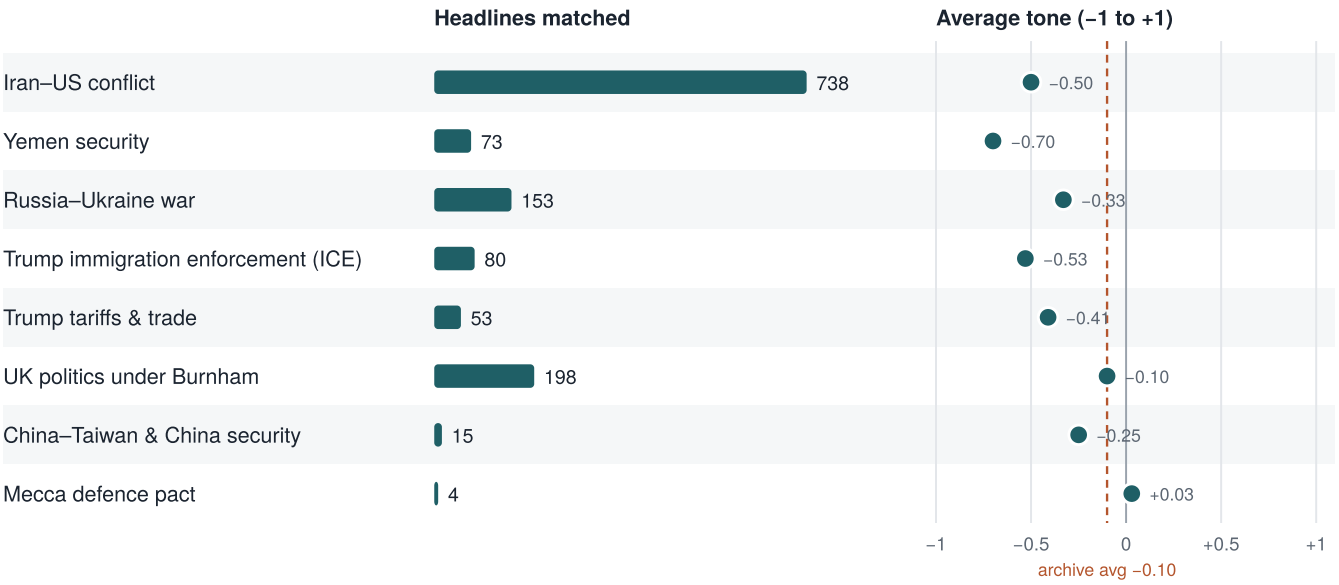

Iran–US conflict	dominated: 738 headlines. Its share of all articles fell from 11.2% in June to 3.1% in October while the tone darkened from −0.34 to −0.59.
Yemen security	was the darkest theme: average −0.70, 96% negative, with coverage growing into October.
Immigration enforcement (ICE)	was the next most negative (−0.53), lowest in July.
Russia–Ukraine war	drew its most coverage in October (55 headlines), also its least negative month (−0.22).
Tariffs and trade	were a summer US–Canada trade war (15 headlines in July, 23 in August) that eased by October.
UK politics under Burnham	stayed close to neutral (−0.10), with a brief lift in the week of his Kyiv trip.
Markets	every stock index ended higher (Nifty 50 +8.3%), gold fell 5.2%, and Brent oil swung from a low of $70.94 to a high of $113.43 before ending near where it started.
Mecca defence pact and China–Taiwan	are too thinly covered (4 and 15 headlines) to show any trend.

Each headline was scored for the tone of the event itself, from −1 (conflict, harm) through 0 (routine reporting) to +1 (cooperation, relief), regardless of which side, party or country benefits. Across the whole archive the average is **−0.10**, and **35%** of headlines are negative.

OVERVIEW

Coverage and tone by theme

The eight themes differ far more in how much they were covered than in tone. Iran–US alone has more headlines than the other seven combined, while six of the eight sit well below the archive average tone of **−0.10**.

Bars: headlines matched to each theme. Dots: average tone; the dashed line is the archive average. 10,668 articles, mostly technology, space and Indian domestic news, match none of the eight themes.

IRAN–US CONFLICT

Coverage fell by nearly two-thirds while the tone darkened

738	−0.50	73%	8 Jun – 9 Nov
HEADLINES	AVERAGE TONE	NEGATIVE	FIRST AND LAST SEEN

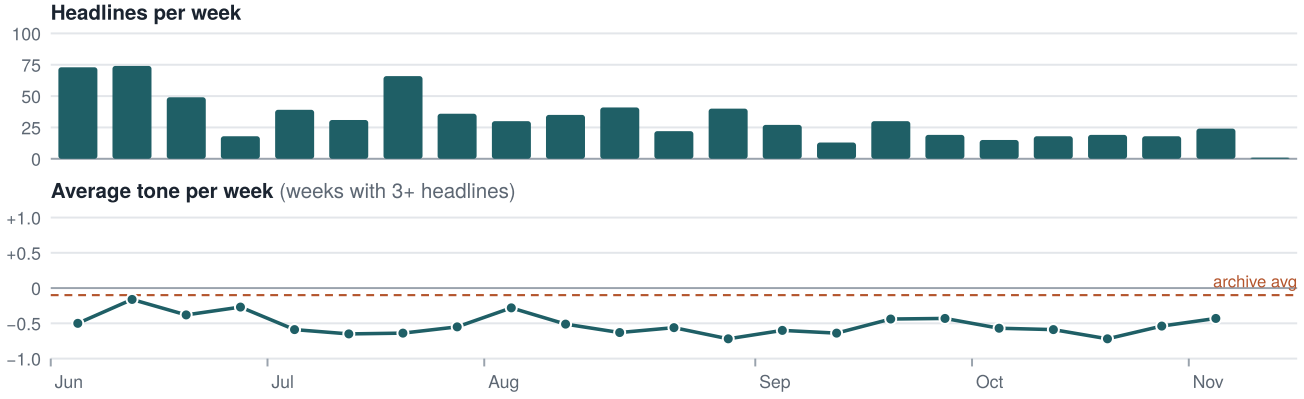

With **738** headlines, **6.2%** of the whole archive, this is by far the largest theme. In June it filled **11.2%** of all articles (**203** headlines, average **−0.34**). By October it filled **3.1%** (**75** headlines), and the average had fallen to **−0.59**.

The least negative week was that of 15 June (**−0.16**), when headlines reported a US–Iran ceasefire and the reopening of Hormuz. After tankers were hit and US strikes resumed, the week of 6 July averaged **−0.59**. A pause in fighting lifted the week of 3 August to **−0.28** before the tone fell back.

Gulf News and Al Jazeera ran **176** and **172** of these headlines. Among the six outlets that covered it most, Khaleej Times averaged the mildest tone (**−0.38**) and Al Jazeera the most negative (**−0.58**). That reflects which stories each outlet led with as much as how it framed them.

CHINA–TAIWAN & CHINA SECURITY

Barely covered by the archive's feeds

15	–0.25	47%	8 Jun – 27 Sep
HEADLINES	AVERAGE TONE	NEGATIVE	FIRST AND LAST SEEN

Only **15** headlines match, mostly about US–China military tension rather than Taiwan itself. They cluster around a Chinese missile test in July and the Trump–Xi summit in late September, and none appear after **27 Sep**. The archive can't show a trend in China's pressure on Taiwan, because your sources' top stories rarely included it.

MECCA DEFENCE PACT

4	+0.03	25%	9 Aug – 6 Nov

The pact appears in only **4** headlines, from **9 Aug** to **6 Nov**. They follow its arc in outline: Türkiye saying it is not aimed at Iran, Bangladesh weighing whether to join, and Türkiye's parliament ratifying it. MARKETS

Stocks rose, gold fell, and oil swung with the Iran–US story

Every stock index ended the period higher: the Nifty 50 rose **+8.3%**, the Dubai index **+6.1%**, the FTSE 100 **+3.8%** and the S&P 500 **+1.6%**. Gold fell **5.2%**, and Brent oil finished almost where it started (**+0.5%**) after a large swing.

Brent fell to its low of **$70.94** on **2 Jul**, after the mid-June ceasefire headlines. It climbed back once tankers were hit and US strikes resumed in July, held above $100 through September and October as Houthi attacks escalated, and peaked at **$113.43** on **1 Nov** before dropping back. The timing matches the Iran–US coverage earlier in this report; one reading a day cannot show what caused the moves.

Each line starts at 100 on 8 June 2026, so a move of 10 means 10% for every instrument. One reading per day, taken when the aggregator ran (usually 05:00 Dubai time), not official closes; weekends repeat the last trading price and 15–17 July is missing.

METHOD

How this was made, and its limits

The archive holds 11,946 articles collected by the daily news aggregator from 8 Jun 2026 to 9 Nov 2026. Every headline was scored by a local language model under one rule (version *event-tone-v2*): the score reflects how negative or positive the event is, and the same standard applies to every party, ideology and nation. Each theme was then matched by keywords in the headline.

- The archive keeps the top three stories per source per day, so it reflects what the feeds led with, not all the news.
- Keyword matching misses some stories and admits a few unrelated ones; the same event reported by several outlets counts once per outlet.
- Tone measures how negative or positive each event is, not who is right.
- Weekly tone is shown only for weeks with at least three matching headlines. November is a partial month.
